Product Manager with 5+ years building digital products, including 3+ years leading B2B SaaS and 2 years as a Frontend Developer. Sole PM of an international booking platform, owning two products end-to-end from strategy to production. Strong bridge between Product, Design and Engineering, backed by a real technical foundation, and an AI-first approach to discovery that turns prototyping into a team-wide speed advantage.

PRODUCT DISCOVERY · ROADMAP OWNERSHIP · PHASED DELIVERY · STAKEHOLDER MANAGEMENT · CROSS-FUNCTIONAL LEADERSHIP
UX DEFINITION · TECHNICAL FEASIBILITY · AI-FIRST PROTOTYPING · AGILE/SCRUM · BACKLOG MANAGEMENT

WORK EXPERIENCE

PRODUCT MANAGER / BLOOWATCH

Remote · 2022–present

B2B/B2B2C SaaS platform for sports schools and active-tourism operators across 15+ countries. Booking, payments, check-in and resource management in one multi-tenant platform.

- Sole PM owning two products end-to-end. Operations back-office and customer-facing eCommerce, in a product trio with Design and Lead Dev, reporting directly to the CEO.
- **eCommerce re-platforming:** led the full rebuild from Ember to React, with a phased rollout sequenced by real customer usage, shipping the checkout first to capture value early and deferring low-usage product types with explicit prioritization criteria.
- **Payments & integrations:** owned GTM/analytics and Google Ads tracking across a multi-tenant setup, and led the PSP migration to the new eCommerce maintaining continuity across payment providers.
- **Forms & Waivers:** defined a configurable builder for booking forms, liability waivers and medical declarations, letting operators manage their own documents and cutting support load.
- **AI-first discovery:** prototyped booking flows and benchmarked competitors with Claude as a standard part of every discovery phase, bringing validated proposals to the trio in days instead of sprints.

FRONTEND DEVELOPER / FREELANCE

Remote · 2020–2022

- Frontend dev in a startup product trio alongside a PM and engineer, shipping features in React.
- Designed and built single-page applications and portfolio sites for professionals, owning both the design (Figma) and the React implementation.
- Designed and delivered websites for businesses and professionals across multiple CMS platforms (WordPress, Shopify, Squarespace), handling design and build end-to-end.
